- With digital acoustic feedback suppression facility
- Attractive, unobtrusive design
- Several operating modes for real flexibility in discussion management
- Suitable for fixed or temporary installations
- Easily extendable

Communication you can rely on

BOSCH

This is all you need for a complete, high-quality discussion system!

Increased intelligibility through digital feedback suppression

Excellent speech intelligibility under all conditions is assured due to a unique, built-in digital feedback suppression facility. This allows the volume to be turned up as required without any danger of acoustic feedback ('howling').

The CCS 800 Ultro discussion system from Bosch brings order and convenience to small/middle-sized gatherings and conferences, without introducing complexity. This versatile and economical system is both easy to install and extremely straightforward to use.

Product Specifications

LBB 3330 Delegate Unit

- Enables delegates to speak and listen to the proceedings
